

LOG HOUSES AND HOLIDAY HOMES

KUUSAMO
LOG HOUSES

BREATHE EASY IN KUUSAMO HOUSES

Excellent indoor air quality is one of the most valued features of a log house. The solid timber wall absorbs excessive moisture from the air and releases it back, thus equalizing air humidity in the apartment. At the same time, the number of harmful fine particles in indoor air is reduced. In bedrooms, log walls can reduce the concentration of carbon dioxide in the air, which is typically increased overnight.

QUALITY OF LIFE FROM KUUSAMO

Log homes offer a casual atmosphere, which is proven to be relaxing. The wooden surfaces promote recovery, reduce stress, and improve the mood. As a building material, wood is warm, cozy, and soothing. Wood is pleasing to the touch. A Kuusamo log home offers an ideal environment for living well.

LOG HOME IS THE RESPONSIBLE CHOICE FOR FUTURE

The building elements of a medium-sized log home have captured more than 20 tons of carbon dioxide. A modern log home that has been designed and built correctly will last from generation to generation, while also meeting the thermal insulation requirements of the future. The amount of energy used for the manufacturing and building process of log and other timber products is a fraction of that of other construction materials.

The high-quality of indoor air, environmental friendliness, naturally healthy and soothing qualities of wood, and functioning as a carbon sink allows log homes to provide solutions to many of our current issues. By deciding to live in a log home, you are making a lot of good choices.

UNIQUELY YOURS

Nuuna 205 T2 is experiencing transformations

An active and energetic entrepreneur family wanted to build a home for the rest of their lives. They were able to find a small fan-shaped urban plot in the middle of a large growth center. Through a few well-earned coincidences, they decided to see if Nuuna would fit the site. It fit perfectly.

The family met with a Kuusamo sales representative.

This is how Nuuna was adapted to fit the plot and the customer's wishes

- 1 The entire front wall was brought level, which increased the floor area to 212 square meters.
- 2 The placement of the entrance was switched to the front section.
- 3 The family wanted to keep the entrance clear from clutter → an L-shaped walk-in closet was added next to it.
- 4 The kitchen windows were replaced by a large sliding door.
- 5 An exercise room was an important addition to the active family.
- 6 Almost all windows were replaced by larger ones.
- 7 Bedroom 1 was replaced by a sauna.

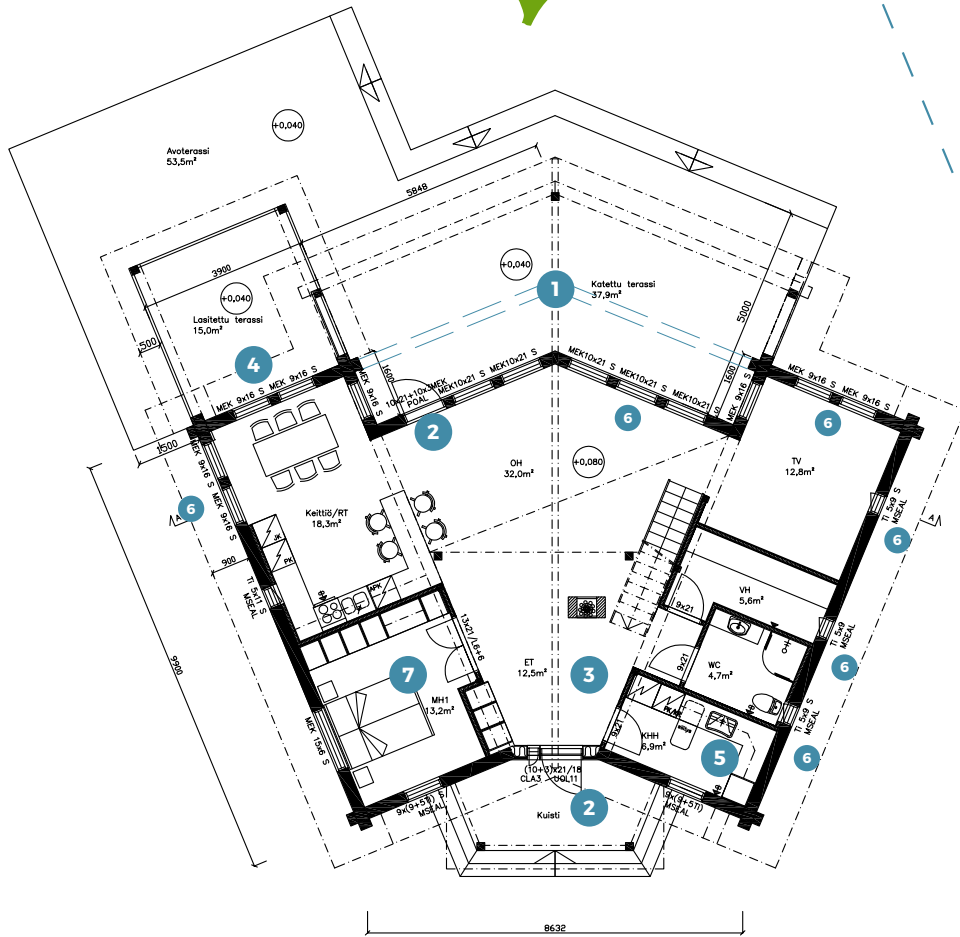

The Nuuna variation is shown on the cover and in pictures on page 4.

NUUNA FAVORITES

NUUNA OFFERS VERSATILITY

Nuuna is not your conventional log home. It offers as much floor area as a typical Finnish log house, but its shape is anything but ordinary.

With its expansive windows, the spacious atmosphere of Nuuna's main living area captivates most people who experience it. The range includes perfect versions for both residential and holiday use.

Nuuna 85 was chosen as the best log house by the public at the Mäntyhärju Holiday Housing Fair. At the Kalajoki Holiday Housing Fair in 2014, Nuuna 129T emerged victorious. The holiday homes charmed the public particularly with their bright interiors and inventive use of space.

CLOSE*-COLLECTION

Sulka 150

Sulka 150

Sulka 150

Sulka 150

Sulka 150

TOGETHER - CLOSE

We started with the idea of a cube. A cube with plenty of glass surfaces. A cube that connects a living room, kitchen, and a dining area in one open space.

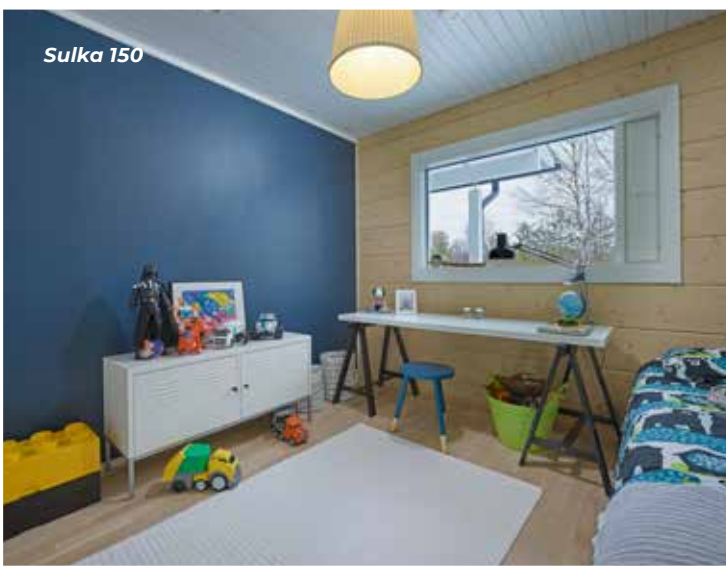

The idea developed into plan, where 12 cubes were given different types of roofs and exterior colors. The number of rooms and the placement of the sauna can be scaled and customized to suit your needs.

The end result is a log home with a unique look. Inside, one person is doing their homework, while another is sleeping. You can smell food cooking. The large windows give the impression that the backyard is part of the house.

Everyone in the same open space living their daily lives *close* to each other. In a log house that is made into a home by the people.

LOG HOUSES

FOR HARSH WINTERS AND HOT SUMMERS

Tested in the harsh winters of Northern Finland and Lapland, Kuusamo log houses are energy-efficient and safe log homes that retain their value.

Our log home range include more than 50 different prefabricated log houses, most of which are also available as variations. Contact your nearest Kuusamo sales representative for more information about our log home kits and we will be happy to help you.

Let us know what you are looking for. We can modify our existing designs based on your wishes, or create you a unique home based on your own design. Depending on your preference for more traditional or modern style of building, our models can also be modified by choosing corner joints, windows, and log profiles that suit your tastes.

HOLIDAY HOMES

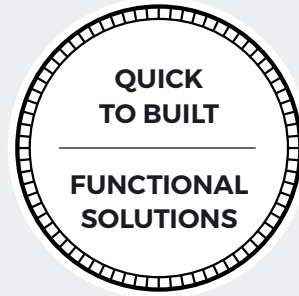

FROM SUMMER COTTAGES TO SECOND HOMES

The most popular questions pertaining to holiday homes concern modifications. Can the dimensions of the house be altered and can it be made suitable for winter habitation. The answer to both of these is “yes”.

Together with the Kuusamo sales representative, you can customize the delivery contents of any model you like to turn it into a more minimalist version for summertime use only. The same model can also be transformed into a second home suitable for year-round use by expanding the basic delivery specifications, which means that the building is delivered with structures, doors, and windows that are similar to the Kuusamo log homes designed to meet the latest energy regulations. This allows you to use your holiday home around the year as a week-end cottage or for remote working, for example.

You can also modify the dimensions of the building, flip the floor plan to a mirror image, add terraces to your holiday home, move partition walls, change the size of windows, or change the roof type. Tell us what you are looking for and we can also create a completely unique holiday home for you if necessary.

QUALITY OF LIFE FROM KUUSAMO

Kuusamo log houses and holiday homes are designed and manufactured at our plant in Kuusamo. We manufacture our products using northern wood processed by Pölkky Oy. Northern wood is a top-quality material with excellent tensile and processing properties.

For us, the new decade began with an investment in an ultramodern wood processing line. Modern production lines, employees specialized in log construction, more than 20 years of experience of the log sector, and northern wood with unparalleled quality offer excellent quality of life for you and your family.

With love from Kuusamo!

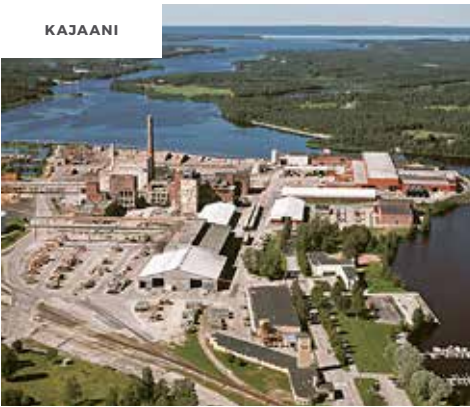

Roots for Quality Living.

HIGH-QUALITY NORTHERN WOOD. SINCE 1968.

Pölkky Oy is the largest privately-owned processor of wood in Northern Finland. The sawmills and processing plants of the Pölkky are located in Finland, in the middle of prime raw wood region.

The company employs approximately 420 wood processing professionals. Group revenue is approximately 200 million euros.

The beauty and durability of Northern wood ennobled by snow and frost is appreciated almost universally. Wood is the only construction material that is compliant with the principles of sustainable development. In processing wood, we aim toward a system whose impact on the environment is reduced to a minimum.

GENUINE NORTHERN WOOD

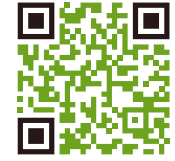

- Production plants of Kuusamo Hirsitalot and Pölkky Oy

KUUSAMO LOG SELECTION

The intended purpose of the building and your personal preferences are key in deciding the type and thickness of the logs used.
